

Laporan Task Sesoris

Done

Board	seo-sesoris_com
Card	CWV Fase 2: Enable Text Compression untuk 3 halaman LCP
Tanggal	2026-05-06
Status akhir	Done

Ringkasan pekerjaan

- Checked live response compression with curl GET and Accept-Encoding support.
- Homepage HTML and Next.js JS chunk are served with Content-Encoding: gzip from Vercel.
- Added explicit compress: true and poweredByHeader: false to next.config.ts; build passed.

Bukti spesifik

- curl --compressed https://www.sesoris.com/ returned HTTP 200 with Content-Encoding: gzip and Content-Type text/html.
- curl --compressed /_next/static/chunks/328152dea2b4a55f.js returned HTTP 200 with Content-Encoding: gzip and Content-Type application/javascript.
- Vercel is already compressing text-based GET responses; HEAD requests do not show encoding reliably, so GET was used for validation.

Catatan lanjutan

- Semrush may need a fresh recrawl to clear the stale recommendation.
