

Sesoris Bilingual Homepage & Category Fix Evidence

Card: Audit Bilingual: Konversi Homepage & Category dari English ke Bahasa Indonesia

Status: Done - deployed to production

Generated: 2026-05-25T13:58:57

Evidence summary

- Converted core storefront currency formatter from USD/en-US to IDR/id-ID with legacy USD-price conversion helper.
- Updated Product schema Offer currency to IDR and converted schema price values.
- Localized homepage metadata, shop metadata/schema, navigation labels, announcement bar, hero slides, category section, featured products, trust badges, product CTA, cart, checkout, and category SEO content.
- Rewrote categoryContent.ts for all active category landing pages into Bahasa Indonesia and removed visible USD/free-shipping-over-\$50 copy from checked category pages.
- Production deploy aliased to <https://www.sesoris.com>. Commit pushed: bc4598b (rebased final branch head).
